FIRST-RATE IN DESIGN AND PERFORMANCE

6 Highlights

P-Profil Rigid and light

The polygonal or drop-shaped P-Profile is especially rigid and simultaneously light weight design perfection.

P-FOLD*

Perfect set-up by fingertip control

The new assistance system makes folding and unfolding an easy job for the crane operator. This significantly increases operator comfort and prevents costly damage.

HPSC-Plus*

Maximum utilization of the working range

The modular system HPSC-Plus offers three modules expanding HPSC. Thanks to load detection, length measurement system or stabilizer force detection, lifting capacity can be maximized.

DPS-Plus / DPS-C*

More efficient fly jib operation

The Dual Power System allows multiple uses of the crane both for large outreaches as well as for heavy load operation.

SRC and RTC*

More comfort in rope winch operation

SRC (Synchronised Rope Control) maintains a constant distance between the pulley head and the hook block, while RTC (Rope Tension Control) is automatically controlling the rope tension. Two systems, which are particularly valuable in terms of operator friendliness and efficiency of operations.

MEXT and WEIGH*

Systems for easy handling

MEXT includes mechanical extensions into the overload protection while WEIGH allows to weigh loads. The result: lower effort for the operator in daily working tasks.
